

SHORT TERM ESCALATION

INSPECTION RECORD
Name of Maintenance Organization:
Physical Address (Location) :
Aircraft Type:
Date of Inspection:
Reliability Program Document No. Issue and date:
Aviation Safety Inspector(s):
Assessment Code: YES = Satisfactory NO = Not Satisfactory N/C = Not Checked N/A = Not Applicable

Item	Assessment			
	YES	NO	N/C	N/A
1. Do the operator's short term escalation procedures accomplish the following:				
(a) List operator's management personnel authorized to approve short term escalation for-				
(i) Operations specifications time increase?				
(ii) Maintenance interval adjustment controlled by a reliability programme?				
(b) Define maximum limitations of short term escalation?				
(c) Contain criteria for data used to justify short term escalation?				
(d) Correspond with the overall programme to ensure that-				
(i) Repetitive AD, life limited parts and certification maintenance requirements are not escalated?				
(ii) Occurrences of repetitive short term escalation that indicate a need for a change in the maintenance programme are restricted?				
(iii) A method is provided for recording all escalation with provision for submitting and reporting escalations to the Authority?				

Inspector's Remarks

Recommendations
The Short Term Escalation Programme has been evaluated in accordance with the GCARs Part 9 (Air Operators Certification and Administration) currently in force and the checklist above.
I DO / NOT / RECOMMEND the Reliability Program to be APPROVED.
